Thank You!

Here’s what happens next:

In a few minutes, you will receive an email from the NGINX Evaluation team with an activation link. Once you have clicked on the link and accepted the NGINX Plus terms and conditions, you will be able to download the certificate and private key for the NGINX Plus packages repository. **The activation link is for one-time use only.** (If you do not receive your activation email 30 minutes after validating your email address, or if your activation link has expired, please [let us know](#).)

To get started with your evaluation, see the installation instructions for NGINX Plus in the [NGINX Plus Admin Guide](#). An NGINX team member will send you an email soon to introduce themselves. They are here to help – they can put you in contact with the necessary technical support if you need guidance, and if you do decide to subscribe to NGINX Plus they can explain the available licensing and support options.

The trial keys we provide will give you access to the repo for the next 30 days. You can download and install NGINX Plus for a specific operating system. The software will stop working when the keys expire, but **if you need more time, please ask**.

We hope your testing proceeds successfully, and thank you for evaluating NGINX Plus!
